**ADJUSTABLE ANGLE DASH MOUNT - DRILLED**

**Printing Spec:PS-001**

This instruction sheet is for mounting the 7160-1237 adjustable angle dash mount to a flat surface.

## **Attaching the mount:**

1. The mount is attached by drilling (4) 1/4" dia. holes in a flat surface where the mount will be attached. Use the adjustable angle bracket to mark the (4) locations before drilling. Verify nothing is behind the flat surface that can be damaged when you drill the holes. The hole pattern is 30mm x 38mm.

2. Place the back plate (with the pressed-in nuts) behind the previously drilled mounting surface.

3. Use the #10-32 x 1" long screws and washers found in hardware bag 7120-0861 to attach the mount to the flat mounting surface by running the screws through the adjustable angle mount, through the drilled flat surface, and into the back plate with the pressed-in nuts.

4. The mounting bracket can be adjusted to the desired position by loosening the angle adjustment hardware, adjusting the mounting bracket, and retightening the angle adjustment hardware in place.

### **Product Mounting Disclaimer**

Gamber-Johnson is not liable under any theory of contract or tort law for any loss, damage, personal injury, special, incidental or consequential damages for personal injury or other damage of any nature arising directly or indirectly as a result of the improper installation or use of its products in vehicle or any other application. In order to safely install and use Gamber-Johnson products full consideration of vehicle occupants, vehicle systems (i.e., the location of fuel lines, brakes lines, electrical, drive train or other systems), air-bags and other safety equipment is required. Gamber-Johnson specifically disclaims any responsibility for the improper use or installation of its products not consistent with the original vehicle manufactures specifications and recommendations, Gamber-Johnson product instruction sheets, or workmanship standards as endorsed through the Gamber-Johnson Certified Installer Program.

**Attaching a Zirkona Semi Truck Mount or a Logistics Pivot Arm Mount and cradle:**

The Adjustable Angle Dash Mount is designed to work in conjunction with a Zirkona Semi Truck Mount or a Logistics Pivot Arm Mount. Once the adjoining mount has been attached a docking station or cradle can be added to complete the setup.
