DUAL DISPLAY CLEVIS MOUNT

ITEM: 7160-1917

Improve operator sightlines and increase warehouse safety when two devices are utilized on your forklifts.

The Dual Display Clevis Mount is designed to secure a printer, additional tablet or other device to your overhead guard leg mount. This mount gives the operator the flexibility to have two tablets visible at the same time and allows for the secondary tablet to be stored behind the primary tablet when not in use. Secondary display allows for placement of secondary (8" or smaller) tablets that do not need to be visible by the operator continuously. Or add a printer without reducing sightlines. The Dual Display Clevis Mount allows mounting a printer at a 90° angle in conjunction with your tablet.

FEATURES

- Easily store secondary display out of operator sightline when not in use
- Allows mounting of tablets, cradles, or docks with 75mm VESA hole patterns
- Improve sightlines by reducing multiple mounting locations on vehicles. Two devices can be mounted in one location.
- Operator can quickly access the secondary device when needed by simply rotating into view
- Store secondary display by simply loosening the adjustable lever, tilt to desired position and then re-tighten the lever.
- Allows mounting of printer at a 90° angle to maximize sightlines
- Heavy gauge steel construction for long-term durability in a rugged environment
- Black powder coat finish for maximum corrosion resistance

SPECIFICATIONS

| ITEM | WEIGHT | HEIGHT | WIDTH | DEPTH |
|-----------|--------------------|----------------|-----------------|--------------------|
| 7160-1917 | 2.75 lbs / 1.25 kg | 3 in / 7.62 cm | 6 in / 15.24 cm | 10.5 in / 26.67 cm |
