Install

1. Remove OEM center seat by removing four bolts with an 18mm socket as shown in Fig 1. Keep bolts for reuse. Disconnect any electrical harness.

*If vehicle has OEM 110V plug, it can be relocated to the passenger side wing.

Figure 1

2. Relocate OEM USB.

*Remove the lower center console trim by removing the bolt in the driver side footwell with a 7mm socket and pulling trim rearward (Figure 2).

*Remove trim on either side of the infotainment screen with a panel tool.

*Using a 7mm socket, remove bolts from behind the trim and 1 bolt by the passenger side fuse box (under side cover).

*Remove the trim panel from around the climate control (unplug ignition switch).

*Partially remove trim panel below steering wheel to expose and remove two bolts (7mm socket) retaining lower trim panel.

*Pull rearward on USB/12V trim panel to remove (trim is held on by clips).

*Disconnect the harness (Figure 2).

Note: Gamber-Johnson does not recommend relocating the OEM 12V socket from the dash into the console due to a potential electrical short that may damage the vehicle electronics (Ref. GM TSB PIT5800)

3. With the trim loose, behind the trim remove the push in clips holding the harness to gain more length then reinstall the center trim pieces. Install the USB housing on passenger side of console (Figure 3).

Figure 3

4. Set the console in place and align 4 mounting holes on the console with OEM seat holes.
***If the Vehicle was specified with the OEM console or center seat delete option, mounting holes will require tapping with an M12-1.75 tap.**

*Before installing seat bolts, attach driver side wings to the console (with provided #10 hardware) (Figure 4).

Figure 4

5. With the wings in place, the console can be attached to the vehicle with the OEM hardware (Figure 5). Torque bolt to OEM specs.

*Front 2 legs in the console can be loosened for adjustment if needed. Tighten after adjustment.

6. With console in place, the passenger side wings and the wing brace can be installed with provided #10 hardware.

*If vehicle has the front 110V plug, it can be installed in knockout on the passenger side wing.
