

INSTALLATION INSTRUCTIONS

Product

7160-0008 VEHICLE BASE

**DODGE CHARGER (2007-2010)
DODGE MAGNUM (2007-2008)**

Revision

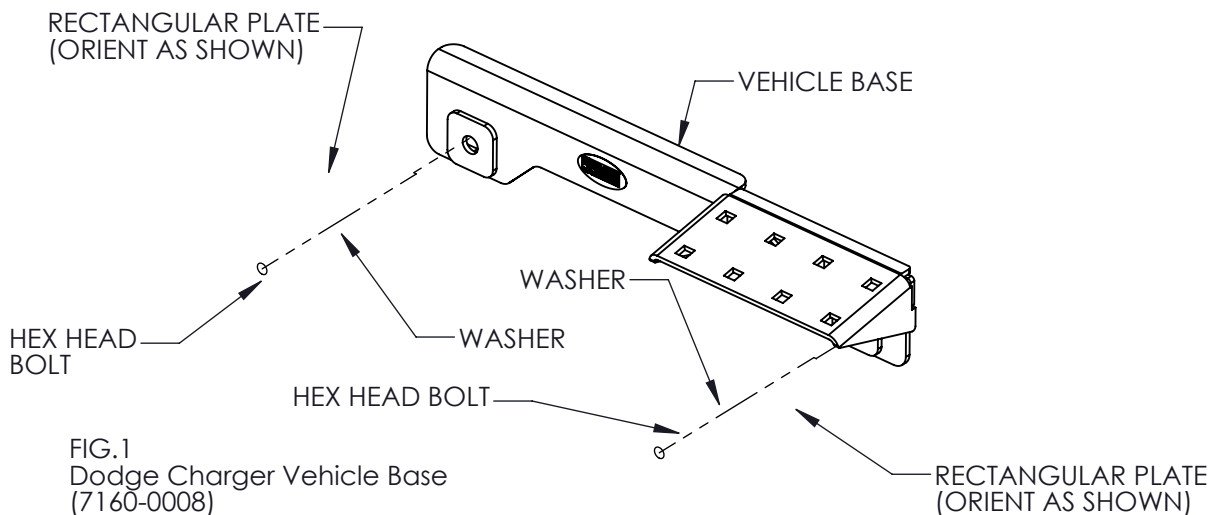

Rev.C

Form

INST-318

Printing Spec: PS-001

The purpose of this instruction sheet is to illustrate the manufacturer's recommended method of installation of the Dodge Charger Vehicle Base (7160-0008). This product is a simple solution that requires no drilling into the vehicle. It is necessary to replace the seat bolts found on the foremost anchor points of the front passenger's seat with those that are supplied in hardware bag 7120-0377.

- 1.Begin by removing the front seatbolts of the front passenger's seat.
- 2.Place the Vehicle Base in front of the bolt holes of the seat legs (see FIG.1)
- 3.Insert the two M10 X 50mm (1.50") Hex Head Bolts into the Washers and Rectangular Plates included in hardware bag 7120-0377 (see FIG.1). Ensure that the Rectangular Plate is oriented as shown in FIG.1
- 4.When the bolts are firmly tightened, the installation of the Dodge Charger Vehicle Base will be complete. Add mounting system components as desired.

CAUTION: Installing this base into the 2006 Dodge Charger/Magnum will compromise the vehicle airbag safety system, possibly endangering vehicle occupants. Seat bolts in 2006 vehicles are tied into the airbag sensor systems. Loosening or removal of seat bolts in the 2006 vehicles will require recalibration and must be performed by a certified Daimler Chrysler service technician.
