INSTALLATION INSTRUCTIONS

Product**Zirkona Mounting System****Revision****Rev K****Form****INST-494****Printing Spec: PS-001**

These general instructions are intended to cover most of the components of the Zirkona product line.

!Warning!

-Always apply thread locker on all M20 threads of the Zirkona product line. Loctite EA 9460, EA 9461 or EA 9466 EPOXY is the recommended thread locker for all these threaded joints.

-Do not exceed maximum payload weight. See charts below:

	<u>Dynamic load</u>	<u>Static load</u>
Small Joiners(7110-1234, -1237, -1239)	3 lbs. (1.4kg)	22 lbs. (10kg)
Medium Joiners(7110-1235, -1222, -1259, -1406, -1407)	6 lbs. (2.8kg)	33 lbs. (15kg)
Large Joiners(7110-1236, -1260)	11 lbs. (5kg)	55 lbs. (25kg)
Large Short Joiner(7110-1416)	30 lbs. (13.6kg)	145 lbs. (65.7kg)

*Extension tubes will lower the overall payload rating of the mount. The longer the extension, the lower the maximum payload of the mount. As a general rule, lower the maximum payload 20% for every 50mm of extension (Ex: 100mm extension = reduces the payload by 40%)

-The suction cup bases require a smooth flat surface to affix to. Both the surface and the rubber of the base should be cleaned with water and/or a mild cleaner. Press the base hard against the surface and pull down the locking lever. Repeat this procedure at least once a month.

Use of the Zirkona product line.

SPANNER WRENCH
(p/n 19511)

The spanner wrench is used to tighten extension tubes onto the joiner bodies. Apply epoxy thread locker EA 9460 on external and internal M20 threads, then insert the hook end of the spanner wrench into the hole of the extension tube to tighten the joint.
