## Vehicle Preparation

1. Start by removing the factory console or wiring cover (shown below). Instructions provided in the vehicle specific Factory Service Manual (FSM)

2. Detach console HVAC duct and set aside. (If also installing American Aluminum K9 Unit consult related instructions for alternative HVAC steps)

## Console Installation

3. (Optional) Remove the two twin USB C modules from the factory console. Use provided mounting locations on **PS Wing** as shown below

4. Place console in vehicle and use four of the factory console mounting bolt to install console

5. Install **Air Deflector** so it rests on top of the HVAC duct using the screws on the sides of the console box

## 6. Electronics Tray

- a. The included **Electronics Tray** can be populated outside of console installation
- b. Once ready to install the **Electronics Tray**, place into console as shown below

## 7. Install **Top Plate** using (4) #10-32" counter sink bolts

8. The driver and passenger side wings can now be installed (Items 4 and 5)

9. Console install is complete and it can be outfitted with faceplates as needed
