BLAC-RAC®
WEAPON RETENTION SYSTEMS
a **TEAM GJ** brand

MODEL 1082

PURPOSE-BUILT FOR MIL-SPEC AR15/M4

Blac-Rac is a paradigm shift in gun rack technology. Designed from the ground up to secure AR type weapons, the 1082 utilizes two opposing side plates that secure the rifle while protecting the take-down pins, magazine release, and trigger from tampering.

The unique design does not interfere with the top rail and hand guards, so there is no need to remove any installed accessories like an optic, a laser, or a flashlight. The single-point mounting system provides enough clearance for weapons with up to a 30-round magazine to be installed. All Blac-Rac products include 5 year limited warranty.

ADAPTABLE

The 1082 is adjustable which ensures a secure weapon mount, minimizing vibrations and preventing annoying rattling.

PROPRIETARY LOCKING MECHANISM

Blac-Rac stands apart from systems vulnerable to standard handcuff keys. Our unique lock core necessitates a proprietary key, significantly enhancing weapon safety and theft prevention. Each system is equipped with two exclusive keys and will open any Blac-Rac weapon retention system.

ROBUST SIDE PLATES

Our robust side plate serves as a protective barrier, preventing unauthorized disassembly of your weapon and safeguarding critical components like the trigger, mag release, and bolt release. Blac-Rac's premium design delivers top-tier protection without obstructing the top rail or installed optics.

ENHANCED SECURITY

The patented AR Retention Post provides exceptional security while providing additional safety features. Purpose built to secure AR-type weapons, the 1082 provides maximum security while allowing quick access when needed.

DURABLE MATERIALS

Cast stainless-steel construction provides exceptional durability, effectively resisting corrosion while ensuring unmatched strength and security.

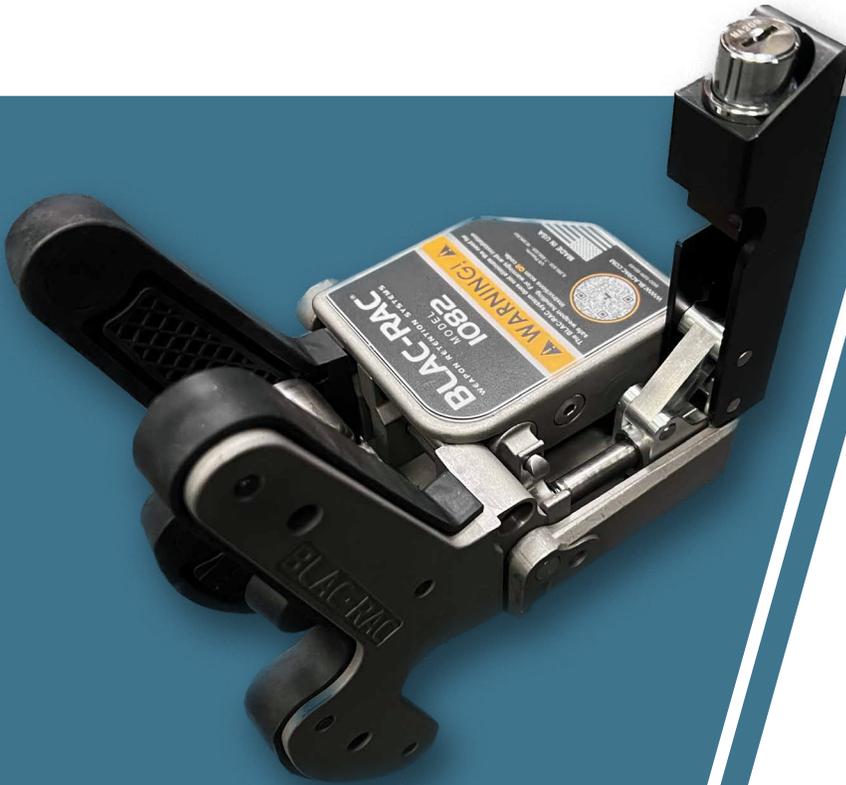

ELECTRONIC ENHANCEMENTS

Advanced electronics include a built-in 8-second timer and is Cold-Wire ready. Cold-Wire technology prevents the rack from being opened if the power wires are cut and an external power source is applied to the power wires.

(normally closed)

▲ To Blac-Rac
weapon
system
wires

Blac-Rac enhances gun rack intelligence. Our electronics prioritize top-tier security and reliability, ensuring hassle-free installation. All Blac-Rac Weapon Retention Systems come Cold-Wire ready, with the built-in receiver. Our Cold-Wire Technology system employs a signal code generator, rendering the lock impervious to tampering via cut power wires and external power sources. Each transmitter supports up to two racks.

CHARGER STOP

Enhances weapon safety and is an easy, bolt-on solution that prevents the AR/M4 from being charged while secured in the 1082.

VERSATILE MOUNTING

SINGLE POINT MOUNTING offers versatile placement options, accommodating both vertical & horizontal installations.

PARTITION MOUNT

Versatile T-Channels, available in both 18" and 10" sizes, can be securely bolted to a partition, accommodating the installation of up to two Blac-Rac gun racks. These T-Channels offer vertical adjustment capabilities, ensuring a customized and precise fit for your vehicle.

STAND ALONE MOUNT

Ideal for use with vehicles without a prisoner partition. We offer two stand options: a 19" tall stand at a 15-degree angle and a 22" tall stand at a 5-degree angle. The installation necessitates the use of a baseplate and installation hardware. Please feel free to reach out to our customer service team for additional information and assistance.

OVERHEAD MOUNT

A diverse selection of available brackets and tube mount sizes allows the 1082 to be installed in a variety of applications. Including roll bars and overhead on partitions, grab handles, or any other suitable location. This versatility is well-suited for open-frame vehicles.
