

WHEN IT'S NOT IN YOUR
HANDS...IT'S IN OURS™

BLAC-RAC®
WEAPON RETENTION SYSTEMS
a **TEAM GJ** brand

MODEL 1088

INDUSTRY-LEADING TECHNOLOGY

Blac-Rac designs gun racks to be stronger and smarter. Our racks are designed to provide the highest level of security and reliability while keeping the installation process simple. Our available Cold-Wire Technology prevents the lock from being opened if the lock's power wires are cut and an external power source is applied to the wires.

LESS-LETHAL LAUNCHER SECURITY

The 1088 secures most single-shot, break front launchers commonly used by law enforcement. The 1088 is available with or without electronic release and shares the same key as other Blac-Rac products. The 1088 can be configured to secure a specific launcher using the supplied retention posts. Each 1088 includes 2 keys. All Blac-Rac products include 5 year limited warranty.

ADJUSTABILITY

Secures launcher tightly to lessen vibrations and limits rattling. The breach width can be adjusted in the field using the Blac-Rac key or a small flat head screw driver.

EASY INSTALLATION

Single point mounting installation can be installed vertically or horizontally.

NO ACCESSORY INTERFERENCE

The unique design does not interfere with rail mounted accessories.

LOCK CORE

Premium, proprietary lock core and key.

MOUNTING ACCESSORIES

A variety of installation accessories are available to suite the end user's application.

ROBUST MATERIALS

Stainless-steel frame construction is highly resistant to corrosion.

TIMER DELAY

An 8-second delay timer is included and integrated into the circuit board. A longer delay timer can be ordered if greater access time is necessary.
