

WHEN IT'S NOT IN YOUR
HANDS...IT'S IN OURS™

BLAC-RAC®
WEAPON RETENTION SYSTEMS
a **TEAM GJ** brand

MODEL 4130

INDUSTRY-LEADING TECHNOLOGY

Blac-Rac designs gun racks to be stronger and smarter. Our racks are designed to provide the highest level of security and reliability while keeping the installation process simple. Our available Cold-Wire Technology prevents the lock from being opened if the lock's power wires are cut and an external power source is applied to the wires.

DROP IN DESIGN

Mounting holes are spaced using industry-standard mounting locations, making it easy to install on existing brackets.

NON-MARRING

The lined, non-marring channel limits the wear of the weapon's finish.

WEAPON SECURITY

Secures weapon tightly to lessen vibrations and potential for irritating rattles.

LOCK CORE

Premium, proprietary lock core and key.

ROBUST MATERIALS

Machined from aluminum billet to tight tolerances, preventing the prying of the lock mechanism and provides superior strength.

TIMER DELAY

An 8-second delay timer is included and integrated into the circuit board. A longer delay timer can be ordered if greater access time is necessary.
