

PRODUCT GUIDE

GETAC V120 LAPTOP DOCKING STATION

PRODUCT NUMBER(S)

7160-2091 SERIES

For more language options and/or questions, please contact a Gamber-Johnson representative at **+1 800.756.9198**

Since 1954, we have been dedicated to providing **RUGGED**, **RELIABLE**, and **RESPONSIVE** solutions that empower professionals in the field.

Thank you for choosing Gamber-Johnson.

Welcome to your new **Gamber-Johnson Docking Station**—engineered for **mission-critical reliability** in the toughest environments. At Gamber-Johnson, we understand that your technology is more than a tool; it's a lifeline. That's why our rugged mounting solutions and docking stations are designed to integrate seamlessly with your equipment, ensuring **secure connections** and **reliable performance** wherever your job takes you.

This guide will walk you through the safe and effective installation of your **Docking Station**.

Inside, you'll find:

- Inventory list of what's included
- Step-by-step installation instructions
- Images for easy reference
- Essential safety information to ensure proper setup and operation

Our commitment to **quality**, **durability**, and **rugged reliability** is built into every product we make.

Important: Before you begin, please carefully review all safety instructions provided in this guide. For vehicle applications, we recommend professional installation by qualified technicians with experience in automotive electrical systems and aftermarket vehicle equipment installation.

For additional product information, installation tips, or support, please contact your Gamber-Johnson representative at **+1 800.756.9198** or visit **www.gamberjohnson.com**.

This Product Guide is for the **Getac V120 Laptop Docking Station**.

Before you begin installation, please review all safety instructions to ensure proper setup. For instructions on computer features, setup, and operation, refer to your device’s manual.

This docking station is designed to work seamlessly with Gamber-Johnson’s extensive line of rugged mounting systems. Visit www.gamberjohnson.com/products to explore our full range of solutions and accessories. Installation instructions for additional Gamber-Johnson products are included with each individual product.

Important: Before installation, ensure you have the recommended power adapters to power the docking station. These can be ordered separately from Gamber-Johnson. Please refer to the list of compatible power supplies included below.

PRODUCT SELECTION	
MODEL NUMBER	DESCRIPTION
7300-0413	Lind Power Supply – Isolated, 12-32 Vdc Input, Bare Wire
7300-0412	Lind Power Supply – Isolated, 20-60 Vdc Input, Bare Wire
7300-0416	Lind Power Supply – Isolated, 72-110 Vdc Input, Bare Wire
7300-0471	Getac Power Supply – Auto, 12-32 Vdc Input, 19 Vdc 120-Watt Output, Cig Adapter
7300-0516	Getac Power Supply – Auto, 12-32 Vdc Input, 19 Vdc 120-Watt Output, Bare Wire

	DESCRIPTION
1	Front Hooks
2	Bumpers
3	Floating Docking Connector
4	Release Handle
5	Rear Hooks
6	Latching Actuators
7	Screen Support Mounting
8	Vesa 75 Mounting
9	Integrated Cable Restraint
10	Dc In 19v, 120 watt

	DESCRIPTION
1	USB-C 3.2
2	USB-A 3.2 (2)
3	RJ45 Ethernet
4	HDMI (-00 and -04 SKU's only)
5	RS232 Serial (5V powered on pin 9)
6	USB-C 2.0 (Front)
7	USB-A 2.0 (Front)
8	Quad RF Pass-Through (SMA) (-04 and -14 SKU's only)
9	DC Power In 19V

Safety is dependent on the proper installation and servicing of this docking station. It is important to read and follow all instructions before installing this product.

To properly install a Gamber-Johnson docking station you must have a good understanding of automotive electrical procedures and systems, along with proficiency in the installation and service of aftermarket vehicle equipment.

There are no adjustments required at any time of the electrical components within the docking station.

Opening the docking station will void the product warranty.

During Installation:

- Do not connect this docking station to the vehicle battery until:
 - All other electrical connections are made
 - Mounting of all components is complete
 - Verification that no shorts exist in the entire system

After Installation:

- Test the docking station to ensure that it is working properly.

General Safety Notes:

- Do not install equipment or route wires or cords in the deployment path of any air bag.
- When drilling into the vehicle, DO make sure that both sides of the surface are clear of anything that could be damaged.

CAUTION

If wiring is shorted to the frame, high current conductors can cause hazardous sparks resulting in electrical fires or flying molten metal.

WARNING

Failure to follow all safety precautions and instructions may result in property damage, serious injury, or death.

File these instructions in a safe place and refer to them when performing maintenance or reinstalling.

Conduct a "Bench Test"

Gamber-Johnson strongly advises a "bench test" be conducted to verify all electronic and software issues are resolved prior to installation:

Before Installation:

- Make sure the computer is operational by itself.
- Insert computer into the docking station and verify that the computer is operating in the dock.
- Interconnect entire assembly and verify start-up of all components, including other equipment (printers, modems, scanners, etc.)

Gamber-Johnson recommends positioning of all mounts and equipment in the vehicle prior to the actual install to verify that mounting locations are safe and practical.

1. A mount with a VESA 75 pattern is required to mount the dock using the 1/4"-20 inserts on the bottom of the dock.(Figure 1)
2. Attach the dock to the selected mount using the 1/4"-20" hardware from the 7120-0413 Hardware Bag.

1. Use cable ties provided in hardware bag 7120-0542 to secure each port cable to the specific strain relief feature on the dock.
2. Use cable ties to secure bundled cables for improved routing.

Operation: Docking

1. Insert laptop into front hooks as shown.(Figure 1 and Figure 2)
2. Lower rear of laptop onto connector then press rear of laptop into the dock until latched.(Figure 3)

Figure 1

Figure 2

Figure 3

3. Release button should read DOCKED (Figure 4 and Figure 5)
4. (Optional) Turn lock 90 degrees to the lock position (CCW) to secure the laptop in dock. (Figure 6)

Figure 4

Figure 5

Figure 6

Operation: Un-Docking

1. Unlock the dock if previously locked. Turn lock 90 degrees to the unlocked position (CW).
2. Push inward on the latch release handle until the rear hook disengage from the laptop.(Figure 1)
3. Lift the rear of the laptop up from the dock and then out from the front hooks.(Figure 2)

Figure 1

Figure 2

Recommended Supplies:

Compressed Air(Canned or Low-Pressure Compressor)

Electronics Cleaner

ESD Swabs

Anti-static Soft Bristle Brush

70% Isopropyl Alcohol Solution

Soft Cleaning Cloth

1. In order to prevent electronic shorts, always disconnect power and devices from the docking station before cleaning.
2. Use compressed air to blow any excess dust from connector area. Use an anti-static brush to gently brush away dirt from connector area.
3. If the docking station has caked on dirt/dust, use Electronics Cleaner and an ESD Swab to gently clean connector. **Always disconnect power and devices from dock when using electronics cleaner to prevent shorts.**
4. The body of the docking station may be cleaned with a soft cleaning cloth dampened slightly with Isopropyl Alcohol solution. Use caution to not contact the electrical connector or any other electronic connections. Do not use other chemicals or abrasives.
5. Let the docking station dry completely before reconnecting power and devices.
