APPLE IPAD DOCKING STATION KITS

Seamless In-Vehicle Connectivity, Charging, and Security for iPads

Designed for mobile professionals who rely on their iPad throughout the workday, Gamber-Johnson's Apple iPad Docking Kits deliver a seamless and reliable in-vehicle experience. Built around a universal USB-C docking platform and InfoCase rugged device cases, these kits provide consistent compatibility across a wide range of iPad models. By leveraging the iPad's native USB-C port, users benefit from direct, efficient charging and data connectivity without the need for additional adapters or workarounds.

Engineered to support real-world workflows, the docking kits provide fast, dependable power, peripheral connectivity, and flexible viewing in both portrait and landscape orientations to match the task at hand. Combined with secure locking and durability tested for in-vehicle conditions, this solution helps keep devices protected, powered, and ready for whatever the day demands.

CERTIFICATES & TESTING

- MIL STD 810H Non-Operational
- STM Operational
- Environmental: Humidity, Thermal Shock, High/Low Temperature – Storage/Operational
- Cycle Test: 30,000 cycles, Latch, Lock
- Electrostatic Discharge: ISO 10605
- Shock Crash Hazard: Test SAE J1455
- EMC Testing: EN 55032, EN 50498
- RoHS, FCC, CE, UKCA

FEATURES & BENEFITS

- Universal docking solution powered by a single USB-C dock and InfoCase rugged cases, enabling seamless compatibility across a wide range of Apple iPads.
- Direct USB-C integration supports seamless charging and data transfer through the device's native port
- Fast, reliable 45W charging keeps iPads powered throughout the workday, even in demanding mobile environments
- Dual USB-A port replication allows easy connection to essential peripherals such as keyboards, printers, scanners, and more
- Integrated keyed lock helps deter theft and secure devices in shared or public-facing environments
- Portrait or landscape docking support provides flexible orientation to match application and workflow requirements
- Engineered and tested for in-vehicle use to ensure dependable performance in rugged, mobile conditions
