DODGE RAM 5TH GEN BODY STYLE - TRASMISSION HUMP BASE

Revision

Rev A

Form

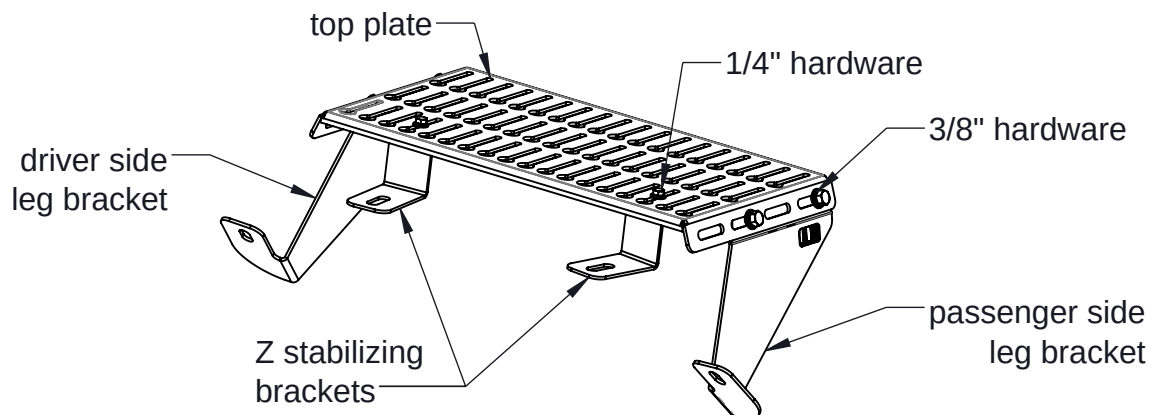

INST-1236

Printing Spec: PS-001

Installation of the Dodge Ram 5th Gen body style transmission hump base:

1. Slide the driver and passenger seats into the rearward position and remove the two interior seat bolts closest to the transmission hump.
 2. Place the driver and passenger side leg brackets under the seat brackets and re-install the seat bolts removed in step 1. Do not fully tighten at this time. If the seat is too tight, you might need to loosen the remaining seat bolts to allow the seat to adjust enough for the brackets to fit underneath. See page 2.
 3. Remove the 2 front center seat mounting bolts and insert the Z stabilizing brackets under the center seat brackets. Re-install the two center seat bolts holding the Z brackets in place. Do not fully tighten at this time. See page 2.
 4. Attach the top plate to the driver and passenger leg brackets with the 3/8" hex bolts, lock washers, and flat washers found in the hardware bag.
 5. Position the Z brackets under the slots in the top plate and attach with the 1/4" hex bolts, lock washers, and flat washers found in the hardware bag.
4. Tighten all the floor seat bolts to hold everything in place.

Attach various components to the top plate by installing the heads of 1/4" dia. carriage bolts (supplied with the various components) through the keyholes in the top plate and tightening in the desired locations.

Product Mounting Disclaimer

Gamber-Johnson is not liable under any theory of contract or tort law for any loss, damage, personal injury, special, incidental or consequential damages for personal injury or other damage of any nature arising directly or indirectly as a result of the improper installation or use of its products in vehicle or any other application. In order to safely install and use Gamber-Johnson products full consideration of vehicle occupants, vehicle systems (i.e., the location of fuel lines, brake lines, electrical, drive train or other systems), air-bags and other safety equipment is required.
