INSTALLATION INSTRUCTIONS

Product	Revision	Form
7160-1261, 7160-1261-01 4" DIAMOND PLATE MOUNT	Rev. B	INST-856 Printing Spec: PS-001

This instuction sheet is for the 4" diamond plate mounts. It is used for mounting lite weight devices such as handheld docking stations and scanners. It utilizes 2 diamond plates that clamp around a flat bar or tube to hold the Zirkona mount in place and a round mounting plate or a Vesa 75mm mounting plate for the device end.

Attaching the mount:

1. The 4" diamond plate mount comes with a round mounting plate on one end for attaching your lite weight device. This round mounting plate has the AMP's and NEC hole patterns. (7160-1261-01 comes with a 75mm vesa mounting plate)

2. Your specific device can be attached before or after the diamond plate mount is attached to the tube. Use the hardware that was supplied with your device to attach it to the round mounting plate.

3. Attach the diamond plate mount to the tube with the 3/8" hardware supplied in hardware bag 7120-0864. Use the 3/8" carriage bolts that best fits your application. Make sure the bolts are as close to the tube as possible. You will need to rotate the diamond plate mount to accomplish this.

4. When mounting to a roll formed tube, try to have one of the mounting plates on a flat side of the roll formed tube. Tighten the bolts until you start to see deflection in one of the diamond mounting plates.
